TEAM MEETING MINUTES ITERATION3

Saturday, March 20, 2021   11:34 AM

☑ **First iteration3 meeting**

4.10 Saturday 6pm   20minutes
In this meeting, we discuss the teamwork division of iteration3
Each team member are assignment 3-4 new routes to implement.
We also discussed how to approach with working on frontend.
Qs to do later:
- Deployment?
- Flask email stuff?

☑ **Second iteration3 meeting**

4.12 Monday 8pm   50mintes
In this meeting, we specify some issues we met during implementation.
 We also discuss GET routes and deploy.sh stuff. We decide to ask tutor
about Connection Error met when deploying.
Qs to do later:
- Lab session, ask tutor about deploy issues
? How to check frontend issues
- Continue working on implementing iteration 3 new routes

☑ **Third iteration3 meeting**

4.13 Tuesday 9pm   1 h 30 minutes

In this meeting, we discussed our progress. The main theme of tonight is to
go through iteration 2 failed auto tests together. We spotted flawed logic of
check_token_valid helper function, which caused about half of the failed tests.
Qs to do later:
- Friday help session
- Server routes

☑ **Fourth iteration3 meeting: Functionality finalisation**

4.16 Friday 3pm   45 minutes
In this meeting, we checked every members' progress. For now, we get almost
all of the new routes to work properly: upload photo static path still not clear,
Deployment still need fixing, timestamp creation needs to be changed.
For tomorrow, we continue working on fix it2 bugs as well as improving it3
Routes.

Qs to do later:
- Interview our target users, complete half of planning
- Fix all iteration bugs (as much as we can)

☑ **Fifth iteration 3 meeting: Debugging functionality**

4.17 Saturday 9pm   40 minutes
In this meeting, we discussed the issues we met while debugging. There are two important errors to
solve: 1. test token invalid: invalidate token after logout? 2. frontend white screen issue, maybe some
return structure is incorrect

We've interviewed the target users and will start writing the requirements part ASAP.
Qs to do later:
- Remaining frontend white screen issue
- Update docstring & assumption

☑ **Iteration 3 meeting: finish Planning and check coverage**

4.18 Sunday 9pm 3 hrs

In this meeting, we firstly try deployment again. Sadly, it still has connection error. But we get simple route like "print Hello" to work, so.. Still a progress! We work on interface design together, and draw two state diagrams through draw io.

We plan to have another meeting tomorrow evening. Hope everything will work out eventually.

Iteration 3 meeting: Finalization
4.19 Monday 8pm 2 hrs 40 minutes
In this meeting, we try to solve the remaining problems, add docstring, go through every functionality
In frontend. We spotted errors and fix them, like send later bugs.
 Planning is finished, coverage is 99%. We did our best!
